ALD automotive awarded ecovadis gold label in recognition of its csr commitments

ALD Automotive, a leader in mobility solutions, has seen its Gold status renewed by EcoVadis, for its performance in CSR commitments internationally.

This international assessment goes hand in hand with results achieved by its local entities. In recent weeks, subsidiaries in the United Kingdom, Belgium and Hungary have also been awarded Gold status and Austria and Slovakia have received Silver medals.

Overall, that brings the number of ALD Automotive Group entities to 13 with Gold or Silver ratings since 2016 (7 Gold and 6 Silver medals).

These top-level awards highlight in particular the Group's focus on the environment and work practices, two of the key pillars of its corporate social responsibility strategy.

Thanks to this new rating, the ALD Automotive Group ranks among the top 15% of the most responsible companies in its sector, based on EcoVadis' scoring system.
