SOCIÉTÉ GÉNÉRALE GROUP

A global leader in sustainable mobility

We're one of the world's leading leasing companies, with approximately 1.9 million vehicles in 29 countries. With over 50 years' experience, we're a trusted partner for companies and individual consumers. Our funding options are tailored around our customers' specific needs, so no matter how many vehicles you operate, we'll find you the right balance between cost, risk and efficiency.

One area we specialise in is the transition to green vehicles. We're committed to moving our entire fleet to zero-emission vehicles by 2030 – and we have extensive tools, resources and support to help your business make the best decisions for its requirements.

When it comes to SMEs, we understand just how important vehicles are to your business. Whether you require 6 or more cars or vans, we're here to help you get what you need, so you can focus on what's next.

We're proud to have been regularly recognised for fleet services at the following industry awards:

The support you need to keep your people **moving**

Our aim is to provide your business with the support you need to keep your people moving, while helping you manage costs and meet all the latest legal requirements. With Ayvens, you're in safe hands.

A dedicated Account Manager for your business

Your Account Manager is there to understand your business, so they can give you answers to your queries, as well as providing guidance on everything from new products and services to changes in tax rules and legislation – and how to handle a move to an electric fleet.

Fleet support from a specialist team

Our customer service team specialise in the challenges that SMEs face, so you can get the support you need when you need it. You can contact them over the phone on **0345 250 0000** or by emailing customerservicesuk@ayvens.com

A dedicated line to look after your drivers

Our driverline is available to help make life easier for your drivers. It covers everything from servicing, MOTs and replacement tyres to roadside assistance and foreign documentation – and it's open 24/7 to provide immediate support with those services that can't be left for later.

An extensive selection of cars and vans

We know that every business has its own requirements, so we've made our range of cars and vans as wide as possible. In fact, it covers the whole market, so you can find exactly what you need – and get it at a great price as well.

Special offers to save you even more money

We regularly have specific campaigns and special offers for handpicked vehicles, so you pay even less for some of the best fleet cars and vans on the market – and the vehicles are often available straight away.

Detailed, in-depth fleet reporting and analysis

Our extensive suite of online tools makes it easier for you to manage your fleet. We have all the latest facts and figures, plus the option to drill down into more detailed analysis that can help you optimise how you use your vehicles.

Short-term vehicle solutions

Getting vehicles for shorter time periods can be a great way to fill gaps in a fleet, support temporary staff or meet seasonal needs. That's why we have Daily Rental from 1 to 28 days, Short Term Rental from 28 to 84 days and Ayvens Flexible from 3 months to 2 years.

Built-in contract flexibility – in-life

We understand that it can sometimes be difficult to estimate mileage for an entire contract when you start a lease. That's why we give you the flexibility to adjust your contract to reflect the true mileage. This helps ensure you don't pay for miles you don't use or face excess mileage fees.

Built-in contract flexibility – at renewal

When your contract is getting close to the end, your Account Manager will be in touch to explain your options. You could order a new vehicle or formally extend your current one for a set period. There's also the flexibility to keep your current vehicle on a rolling contract until your new one is ready.

Maintenance packages that simplify fleet costs

We'll guide you through the transition to electric

Optional maintenance packages to simplify fleet costs

Our maintenance packages make it much easier to keep your fleet moving – and could save you money as well. One monthly payment covers tyres, servicing and MOTs, plus we arrange everything for you, with the option of collection and delivery nationwide.

Mileage pooling to cut your costs

For fleets with more than ten vehicles, we offer mileage pooling, so you can offset under-mileage and over-mileage vehicles. It reduces the chances of having to pay additional costs for over-mileage and allows you to use your fleet more effectively.

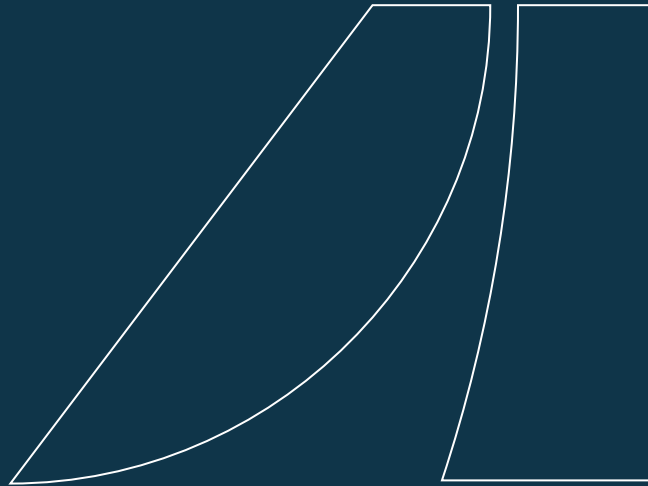

Managing the switch to an electric fleet

We want to encourage all SMEs to consider the benefits of electric vehicles, so we have lots of help and support with the transition – from your Account Manager's personal assistance to tools and guides on our website.
