3 How do we collect your data?

We and our service providers collect Personal Data in various ways, including:

- **Through sales activities**

We commence the processing of Personal Data if you provide this, directly or indirectly via third parties, e.g. as part of an offline sales lead, registration, online contact form, inquiry by e-mail, telephone, chat and/or application, survey or price competition.

- **Through our Services**

Most of the Personal Data we collect is in relation to the Services we provide or will be providing to you as (i) a Driver and our Customer, your employer, if you are using a company vehicle, or (ii) a Private Lease Customer. This starts with the registration of your Personal Data relating to the vehicle to be leased (in some circumstances, we carry out some preliminary credit checks first). It continues with the registration of the leased vehicle and when we communicate with you about our services, e.g. to arrange periodic maintenance and repairs. We may also process your Personal Data when your vehicle inadvertently is involved in an accident, to ensure that we restore mobility and handle any damage, or where we are the recipient of traffic fines in relation to your leased vehicle.

Next to our core leasing activities, we also provide a number of other related services, such as e-mobility services, fuel card services, charging services, car rental services, and roadside assistance. Another service we provide relates to car remarketing, the sale of used Ayvens vehicles.

- **Online**

We collect Personal Data from you online, when:

- You visit our websites or social media channels;
- Place an order over the phone or contact customer service;
- Joint marketing partners share the information with us;
- You connect your social media account to your Services account or when you share information from our websites on your social media platforms, you will share certain Personal Data from your social media account with us, for example your name, e-mail address, photo, list of social media contacts, and any other information that you make accessible to us when you connect your social media account to your Services account.

- **Offline**

We also collect Personal Data about you offline, for example when you visit our premises, place an order by phone or contact our customer services department by phone.

- **From other sources**

We also receive your Personal Data from other sources, for example:

- Drivers' employers, if you use a company vehicle;
- The relevant authority (e.g. police or justice department) when we are the recipient of traffic fines in relation to your leased vehicle;
- Public and government authorities, including public and government authorities outside your country of residence, where we are subject to sanctions and embargoes or anti-money laundering and counter terrorism regulations;
- From our independent service partners who assist us in providing our leasing and other services to you, including dealerships, maintenance providers and body repair shops;
- From our partnerships being for instance original equipment manufacturers or dealerships; and
- Publicly available databases, credit reference agencies and other sources.

We need to collect Personal Data in order to provide the requested Services to you or to handle queries, comments or complaints related to our Services. If you do not provide the Personal Data requested, we may not be able to provide the Services. If you disclose any Personal Data relating to other persons to us or to our service providers in connection with the Services, you thereby indicate that you have the authority to do so and permit us to use the information in accordance with this Statement.

Monitoring of communications

Subject to applicable laws, we will monitor and record calls, e-mail, text messages and other communications we have with you. We do this for compliance with regulatory rules, self-regulatory practices or procedures relevant to our business, to prevent or detect crime, in the interests of protecting the security of our communication systems and procedures, and for quality control and staff training purposes.

For example, where we are required by a regulator to record certain telephone lines (as relevant) we will do so. In addition, where appropriate and having regard to applicable data protection law, our monitoring will be to check for inappropriate content in communications. In very limited and specific circumstances we may conduct short term carefully controlled monitoring of your activities where this is necessary for our legitimate interests or to comply with a legal obligation. We may do this for instance when we have reason to believe that fraud or other crime is being committed, where offences are suspected and where the monitoring is proportionate to the type of the disciplinary offence, or where we suspect non-compliance with sanctions and embargoes or anti-money laundering and counter terrorism regulations to which we are subject. This processing is based on our legitimate interest and is also related to delivering the Service to you and your employer under the performance of the lease agreement that we have with your employer.

By way of example, on the basis of such dashboard reporting, each Customer has access to (i) various data pertaining to the CO₂ emissions of its vehicle fleet per country, and (ii) measures proposed by Ayvens to reduce the fleet's environmental impact. Ayvens is a global service provider that has customers and branches around the globe. Your Personal Data may be stored and/or processed in a country other than the one you reside in.

Some of the non-EEA countries are considered to provide for an adequate level of protection of your Personal Data, according to EU standards. You can find a list of these 'adequate countries' [here](#). For the transfer of Personal Data to other countries, Ayvens has put in place adequate measures to protect your Personal Data, such as Standard Contractual Clauses.

7 Children's privacy

Our Services are not directed at individuals under the age of 18.

Do we use your data for other purposes?

9 How long will we keep your data?

Personal Data of data subjects will be kept for the period necessary to fulfil the purposes described in this Statement unless a longer retention period is required or permitted by law.

In those circumstances, we will write to you explaining why we are unable to comply at that moment or we will comply at a later stage when the backup is overwritten.

In your request, please clarify what Personal Data you would like to access or have changed or deleted, or otherwise let us know what limitations you would like to put on our use of your Personal Data.
